

Welcome to the bright side of cybersecurity

Company overview

ROHDE & SCHWARZ

Cybersecurity

Rohde & Schwarz Cybersecurity

Rohde&Schwarz Cybersecurity protects companies and public institutions around the world against cyberattacks. We develop highly secure encryption solutions, next generation firewalls and firewalls for business-critical web applications. They deliver state of the art protection thanks to innovative concepts and cutting edge technologies for desktop and mobile security as well as for secure information exchange in cloud environments.

To prevent cyberattacks proactively, rather than reactively, our trusted IT solutions are developed according to the security-by-design approach.

Rohde & Schwarz

The Rohde&Schwarz technology group develops, produces and markets innovative test and measurement, information and communications technology products for professional users. Rohde&Schwarz focuses on test and measurement, broadcast and media, cybersecurity, secure communications and monitoring and network testing, areas that address many different industry and government-sector market segments.

Founded more than 80 years ago, the independent company has an extensive sales and service network in more than 70 countries.

Cybersecurity enables digital transformation

In order to stay competitive in a connected world, companies need efficient digital processes. At the same time, public authorities seek to provide time and cost saving digital services for citizens and businesses.

With the advance of the Internet of Things and Industry 4.0 new business models and chances arise. But with the ever increasing number of connected devices and IT systems security concerns grow. Professional cybercriminals search for vulnerabilities in order to attack digitized infrastructures, connected factories and industrial control systems.

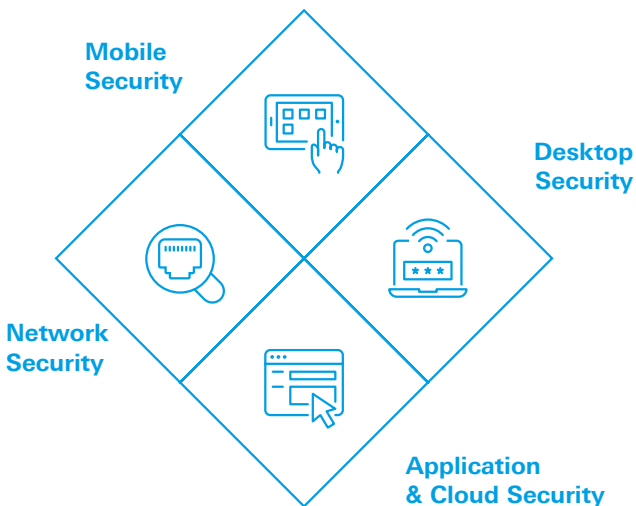

Therefore, cybersecurity has become the essential prerequisite of digital business processes, ensuring their availability, efficiency and operation in compliance with current data security regulations.

Rohde&Schwarz Cybersecurity takes on this challenge. Thanks to its expertise throughout all segments of IT security solutions, its focus on efficient business processes and its broad portfolio of products from a single source, Rohde&Schwarz Cybersecurity is the ideal partner for a successful digital transformation, now and in the future.

Our solutions

To minimize cybersecurity risks, we pursue a holistic approach to cybersecurity, combining both leading technical solutions and consulting services. Thanks to a broad portfolio of complementary solutions, we cover all areas of IT security. They are scalable and, thanks to constant updates, always comply with the current state of the art.

Desktop Security

Our desktop security solutions protect laptops and PCs against cyberattacks and the loss of sensitive information. Technologies such as full virtualization of browsers, separation of business and private data, and full-disk encryption ensure unparalleled security.

- ▮ **R&S® Browser in the Box** – Browser Virtualization
- ▮ **R&S® Trusted Desktop** – Desktop Virtualization
- ▮ **R&S® Trusted Disk** – Full-Disk Encryption

Application & Cloud Security

Web applications, web services and clouds are the backbone of digital business. Our solutions provide comprehensive protection for Web-based applications and ensure data security across cloud-environments as well as collaboration tools.

- ▮ **R&S® Web Application Firewall** –
Secure Web Applications, Web Services & APIs
- ▮ **R&S® Cloud Protector** –
Web Application Firewall as a Service
- ▮ **R&S® Trusted Gate** –
Secure Clouds & Collaboration Tools

Network Security

Our high-performance encryptors and next-generation firewalls ensure reliable and resilient networks. The integration of technologies such as Deep Packet Inspection and SSL-Inspection provides full visibility into network traffic and protection against complex cyberattacks.

- ▮ **R&S®SITLine ETH** – Secure Site-to-Site Connections
- ▮ **R&S®SITLine IP** – High-Speed Encryptor for Critical Ops
- ▮ **R&S®Unified Firewalls** – Next-Generation Network Security
- ▮ **R&S®Trusted VPN** – Secure Remote Access

Mobile Security

Our tap-proof smartphones, tablets and messengers ensure secure mobile communications in critical situations. They protect confidential information flows through hardened operating systems and strict separation of private and business data.

- ▮ **R&S®Trusted Mobile** – Tap-Proof Smartphones and Tablets
- ▮ **R&S®Trusted Communicator** – Secure Messenger

Consulting

Cybersecurity requires more than just technical measures. Organizational processes and awareness also play an utterly important role. Our consulting team delivers realistic advice for a successful implementation of cybersecurity measures in companies and public authorities and solutions that have been tested in our Future Security Lab and Cyber Training Academy.

Consulting:

Risk analysis, audit, strategy

Development:

Tailor-made hardware and software

Integration:

Simulation, testing, and implementation

Legal requirements for security and data protection are on the rise. They represent a challenge for companies that can be turned into a competitive advantage. Our consulting team will help you to ensure that current and future compliance GRC demands are met within your organization.
